

CULTIVATOR

The Brand name Atespar cultivators produced are manufactured in two different models as with and without pipe and with 5-7-9-11-13 and 15 tines. It is used for secondary dressing of soil, preparing seed bed, cutting the root crops, improving the distribution of water and preventing the soil from making sole. Cultivator keeps the moisture of soil as it does not process the soil by overturning and it hoes and airs by adjusting the changable tines distances.

Technical Specifications	Model (Cultivator)			
	A.C7	A.C9	A.C11	A.C13
Number of Tine	7	9	11	13
Total Width (N cm)	170	220	270	320
Working Depth (max cm)	25	25	25	25
Total Weight (kg)	220	270	320	370
Technical Specifications	Model (Rotary Harrow)			
	A.RHT 7	A.RHT 9	A.RHT 11	A.RHT 13
Number of Rotary	4	4	4	4
Row Number	2	2	2	2
Working Width (cm)	175	225	275	325
Weight (kg)	260	290	320	350
Rotary diameter (cm)	30	30	30	30
